TDIG Closing remarks

- Convergence towards a model:
 - PhotDM is in the process of being DMLized
 - Characterisation needs to be DMLized
- Different serialisations VODML-Lite & utype
 - For the next interop I think the TDIG should concentrate on the practical usage by clients
- A proposal for a TIMESYS element in VOTable
 - Work with Apps to add element to VOTable
 - Work with Semantics to set-up the needed vocabulary
 - Work with data providers towards implementations
- HAPI protocol to access Time Series from heliophysics
